SCIENCE

The James River now has a healthy Bald Eagle population. During the late 60's and early 70's there were almost no nesting pairs of eagles on the James River and the eagles in North America were considered endangered. A large part of the decline was due to the insecticide DDT. Explain why DDT caused so much harm to the population of eagles. Do you think laws that protect endangered species are worth having?

ENGLISH

Man v. Self Conflict: Percy struggled with a terrible decision when he ultimately decided what to do with those three pearls. Would you have done the same thing? Did you agree/disagree with Percy's reasoning regarding his treasure (Mom)?

HISTORY

Tell me about the myth of Romulus and Remus, how does it similar to other famous stories?

MATH

What fraction of the food you ate for dinner tonight was vegetables? Protein? What ingredients needed to be measured to make the meal? What type of fractions might you use in cooking?
