

I read the book *Drums, Girls, and Dangerous Pie*, written by Jordan Sonnenblick. The best word to describe the book is emotional. It stands out from other books because there are many ways you can relate. The book is about a boy whose younger brother gets diagnosed with leukemia (cancer); meanwhile, he is trying to juggle girls and school at the same time. Some of the highlights of the story are when Steve meets a girl named Sam at the hospital and when he shaves his head for his little brother Jeffery. What I won't tell you is something that happens to Steve's friend. I think you would enjoy this book because every moment is precious.
