

If you like fantasy, adventure, and mythical creatures like dwarfs, elves, and wizards, then *The Hobbit* is the book for you. The book starts out by describing a normal hobbit. A hobbit is a small creature that looks like a human and is very sneaky. The main character is a hobbit named Bilbo, and he does not want to go on any adventures and does not think he has any part in the world. He soon finds out when a wizard and twelve dwarfs show up at his house for dinner unexpectedly and ask him to help them take back their mountain where they live since it was taken over by a dragon. He plays a huge role in the survival of a dwarf clan by helping them retake their homeland through a journey to the mountain where the dragon lays. *The Hobbit* is a very good book because there are lots characters and side stories that make it fun and interesting for the reader. It is also entertaining to read about Bilbo's adventures and the lessons he learns along the journey.
