

If you like medieval times, and you like mythical creatures, then *Rangers Apprentice* is the book for you. The book is about a young boy, named Will who becomes an apprentice to a ranger. The Rangers are like the Navy Seals during the time the book takes place. In Will's training, he learns he has a natural talent of stealth that helps him get out of sticky situations. I enjoyed this book because Will defends his kingdom with just a long bow, sword, and some friends. If you like mythical, medieval stories, then this is the book for you.
